PRATIK PATIDAR

Frontend Engineer · React.js · Next.js · SvelteKit · TypeScript

Indore, India • pratikpatidar7990@gmail.com • +91-8269647990 • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Frontend Engineer with 1.5 years of production experience across React.js, Next.js, and SvelteKit, building high-performance web applications and owning UI features end-to-end—from Figma handoff through REST API integration to release. Possesses strong full-stack capabilities with Node.js/NestJS and MongoDB. Measurable impact: cut initial JavaScript bundle size by **~40%** via route-based code splitting, lazy loading, and dynamic imports, and eliminated UI scroll latency on high-density datasets using table virtualization.

TECHNICAL SKILLS

Frontend & UI:	React.js, Next.js (SSR / App Router), SvelteKit, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
State & Forms:	Redux Toolkit, Context API, React Hook Form, Zod, Svelte Stores
Backend & DB:	Node.js, NestJS, MongoDB, REST API Design & Integration, JWT Authentication (HttpOnly)
Testing & Quality:	Jest, React Testing Library, Manual Testing, Cross-Browser Compatibility (Chrome, Firefox, Safari)
Optimization & A11y:	Lazy Loading, Code Splitting, Dynamic Imports, Virtualization, Lighthouse Audits, WCAG Guidelines, ARIA
Tools & Workflows:	Git, GitLab CI/CD, Vite, npm, ESLint, Postman, Figma, Jira, Agile/Scrum, Chrome DevTools, MCP SDK

PROFESSIONAL EXPERIENCE

Frontend Engineer — **Techstuff Private Limited** *May 2025 – Present*

- Engineered core modules on Mercanis (B2B SaaS procurement platform) primarily in SvelteKit and TypeScript, integrating complex REST endpoints and authoring NestJS backend routes when required.
- Partnered with backend engineers to define REST API contracts (payload schemas, validation rules, error handling) prior to UI implementation, accelerating screen delivery and minimizing rework.
- Architected and implemented end-to-end JWT authentication—from NestJS token handling to secure HttpOnly cookies, route guards, and frontend session management.
- Delivered and shipped 8+ production features (procurement workflows, vendor dashboards), authoring comprehensive test suites and collaborating with QA under GitLab CI/CD release cycles.

Frontend Developer Intern — **Techstuff Private Limited** *Feb 2025 – May 2025*

- Developed modular React.js and TypeScript UI components adhering strictly to Figma specifications under senior engineering code reviews.
- Integrated RESTful APIs into production screens and resolved edge-case defects identified during QA cycles, reducing reopened tickets in subsequent sprints.
- Adopted team Git/GitLab engineering practices—submitting structured merge requests, managing feature branches, and deploying production code independently.
- Built foundational UI components that were incorporated into the team's shared component library and remain in active production.

KEY PROJECTS

Mercanis — B2B SaaS Procurement Platform *Production Client Platform*

SvelteKit · TypeScript · NestJS · MongoDB

- Owned frontend features end-to-end for an enterprise platform utilized daily by procurement and supplier-management teams.
- Designed and built a reusable component system (20+ components: dynamic forms, tables, modals, navigation) adopted across all platform modules.
- Reduced initial JS bundle size by ~40% through lazy loading, code splitting, and dynamic imports; implemented list virtualization on scheduling grids to eliminate scroll lag.

Enterprise HR & Payroll Platform *Internal Enterprise Platform*

Next.js · TypeScript · NestJS · MongoDB · Model Context Protocol (MCP)

- Built and scaled an internal HR/payroll platform managing attendance, calendar, leave, and candidate pipelines using Next.js and Redux/Context API.
- Implemented a CLI/loopback OAuth-style authentication workflow (authorization, one-time code exchange, token refresh) atop NestJS.
- Engineered an MCP (Model Context Protocol) server using the official SDK, exposing authenticated HR/payroll tools so AI assistants can query and manage enterprise data securely.

EduMiracle — Student ERP Portal *Vercel Live*

Next.js 16 · TypeScript · MongoDB · Tailwind CSS · Recharts · Gemini AI

- Architected and launched a full-stack coaching institute ERP featuring live attendance tracking, Recharts-based test analytics, and a CBT exam simulator.
- Integrated Google Gemini AI for automated real-time student doubt-solving, alongside role-based access control (RBAC) for institute staff.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering *2020 – 2024*

Barkatullah University, Bhopal CGPA: 7.89 / 10.0
